

REcolorado.com Updates

Sound Score

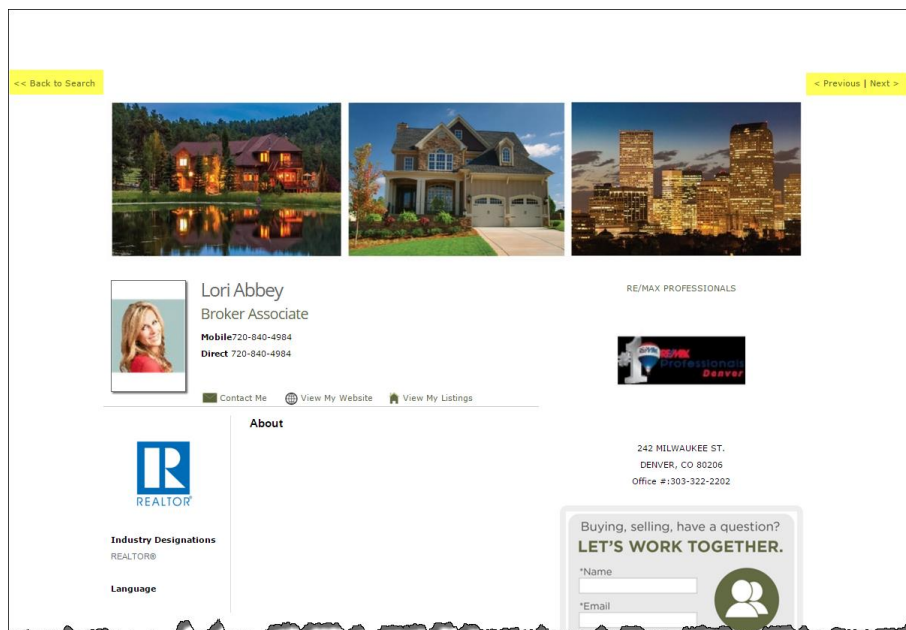

A new Sound Score widget has been added to the property details page on REcolorado.com. Sound Score provides a guide to how loud a property may be due to environmental noise. This new tool is part of our ongoing effort to increase the stickiness and informative content we provide to REcolorado.com visitors.

- The Sound Score rating is based on aggregated environmental noise caused by vehicle traffic, airplane traffic, and local sources (schools, restaurants, stores, etc.).
- Clicking the widget displays the property’s Sound Score. Scores are between 0 (very loud) and 100 (very quiet) and includes a color-coded heat map of sound based on the property location and surrounding area.

- **Browser Back Button Functionality** – The browser back button functionality has been improved to return you to the search results page you were viewing before drilling into the listing details.
- **Next, Previous, and Back to Search Functionality** – Additional functionality has been added to the Agent and Office profile pages when viewed from the search results. Users are now able to move from agent or office profile to agent profile by using the previous and next links and return to the results for a specific search using the back to search link.

Matrix Updates

Listing Input Updates

- School of Choice / Open Enrollment** is a new optional field on Residential Attached, Residential Detached, New Home Community and Income input.
 - This field allows you to indicate if the property is in an area that has this school enrollment option.
 - It is available on the Full displays, searchable under Residential, Income and Cross Property searches, and can be added to custom exports and single line displays.

- Accounting/Legal, Advertising/Permits, and Other Services** are new financial fields available on Income input.
 - The new financial fields are included on the Income Full displays, available under additional fields for Income and Cross Property searches, and can be added to custom exports and single line displays.
 - These fields have also been added to the Income Full Export and Presentation Export templates.

Other Matrix Updates

- Updated PDF Input Forms will be available in Matrix & CONNECT Help for all property types. The forms include the date it was last updated at the bottom right of each document.
- When changing a listing to Under Contract, you will now only be able select either of the “Short Sale” Contingent Approval Conditions if Short Sale has been selected under Status Conditions.
